

WILDFIRES ARE DESTROYING CALIFORNIA.

Climate change is devastating California with extreme heat, prolonged droughts and dangerous wildfires that are taking lives, destroying homes and hurting our economy. The economic damage from the 2018 wildfires alone was \$148 Billion—and the fire season is getting worse. If we don't take strong action now, the problem will become worse and the solutions more costly. More than 90% of voters agree: we need to do more now to fight and prevent wildfires.
